

## Introducing the Ava Group

Security risk management solutions

**The Ava Group is a market leader of risk management services and technologies, trusted by some of the most security conscious commercial, industrial, military and government clients in the world.**

The Group features a range of complementary solutions including intrusion detection and location for perimeters, pipelines and data networks, biometric and card access control as well as secure international logistics, storage of high value assets and risk consultancy services. Through decades of innovation, the Ava Group continues to build upon a comprehensive portfolio of premium services and technologies for the most complex and demanding markets.

Our business truly serves a global market, with our knowledgeable team spread across six continents, providing market and industry expertise directly to customers. With thousands of sites protected, the Ava Group is proven to deliver first class services and technologies that surpass the expectations of our partners and end users.

## Future Fibre Technologies

Future Fibre Technologies (FFT) manufactures and markets a range of fibre optic intrusion detection and location systems that are, quite simply, the world's most effective solution for securing high value assets and critical infrastructure.

Deployed by some of the most security conscious industrial, military and government organisations in the world, FFT's advanced applications include:

- Perimeter intrusion and detection (fence mounted and covert buried)
- Data network tapping and tampering detection
- Oil and gas pipeline third party interference (TPI)
- Other applications including health, safety and traffic monitoring

FFT are specialists in fibre optics, with a product range built on many years of knowledge and experience solely developing superior technology that maximises sensitivity and probability of detection, whilst minimising the probability of nuisance alarms, providing a more reliable solution.

With a broad, versatile product portfolio, FFT's solutions are suitable for a wide range of applications and are effective for both short and long distances.

There are more than 1,500 FFT systems installed in 69 countries, supporting a wide range of customers. With each new project comes a set of new and familiar challenges and our highly skilled team works with clients to create a complete solution that fits their needs and exceeds their expectations.

## BQT Solutions

BQT Solutions is a specialist in the development, manufacture and supply of high quality, high security card and biometric readers, electromechanical locks and related electronic security products.

BQT Solutions provides a wide range of both off-the-shelf solutions and purpose tailored solutions. We work with major system integrators, security consultants and end users to develop tailored access control solutions to fulfil a range of access control requirements.

Specializing in high-security verticals such as Airports, Hospitals, Prisons, Military and Government, our team has the proven expertise to address the ever-changing complexities associated with the design, development, and implementation of a diverse market.

Our principal objective is to provide the right smart reader and biometric technology for the assessed risk. This means transaction safety and keeping people, assets, data and IP safe. For those with the most demanding security requirements, adequate verification and mutual authentication is assured using trusted encryption standards.

The BQT branded suite of Smart Card readers uses MIFARE® Classic, MIFARE Plus® and MIFARE® DESFire® EV1 contactless smart card technology. BQT's line of Biometric Readers combines our traditional line of readers with leading-edge bio-verification technologies including finger and Iris reader technologies for secure options right up to Military grade encryption. We also provide locking products for doors, gates and cabinets.

## Ava Global

Ava Global (Ava) offers a new approach to secure international logistics. The company is founded on the expertise of its management team, who combine years of experience in secure international logistics and secure storage solutions. Their focus is on proactive communication, unparalleled customer service and operational independence, transparency and honesty.

Ava Global provides international secure logistics of high value cargo on a fully insured door-to-door basis. This includes armoured vehicle collection and delivery at origin and destination, secure storage, commercial and chartered air and sea freight and customs brokerage services.

Ava Global are raising operating standards on a local and a global level to give a better and more sophisticated service. To do this we have invested time and money in those independent service providers who form their strategic partner network, in order to deliver services of the highest standards.

With a dedicated Risk Director and team of expert consultants, shipments are in the safest hands. Ava Global pays close attention to detail and takes all exposure to risk seriously. All service providers are selected on the basis of their operational capability, for customer assurance and peace of mind. Established in 2016, Ava Global is proud to be insured by Lloyd's of London.

## Ava Risk Consulting
